

## FOR IMMEDIATE RELEASE

Littleton, Colorado – **American Civil Constructors Inc.** continues to strengthen its market position with the divestiture of its landscape maintenance operations allowing it to focus on its core construction business.

**American Civil Constructors, Inc.** sold the landscape maintenance and public works operations in place under **ACC Landscape Maintenance** on May 15, 2009 to **Progress Equity Partners, LTD** out of Dallas, TX. This venture included contracts, assets and employees from the Colorado and California markets.

This business decision will allow **ACC** to focus and grow its civil infrastructure construction portfolio of projects including heavy highway and bridge construction, parks, sports complexes and environmental restoration.

“ACC’s thoughts are on the future – we are positioning ourselves to come out of this current economic downturn, positioned for growth,” stated CFO, Jeff Rudolph. “With that goal in mind, we have chosen to focus on our core business. We will emerge stronger.”

**American Civil Constructors Inc.** has built a reputation for exceptional service and a commitment to client satisfaction. Combining decades of experience with a singular passion for outstanding work, **ACC** brings an impressive track record of consistently successful projects across the United States.

**ACC** is known in the local Colorado market as a strong competitor in the civil and landscape construction industries. They have a 36-year history and are responsible for many well known projects such as Fossil Trace Golf Course, Coors Field, the seismic retrofitting of the Bay Bridge in San Francisco, and Bethel Island Redevelopment. Currently they are working on the I-70 Viaduct Retrofit in Denver, North Nevada Avenue Bridge in Colorado Springs, Benicia Bridge in Benecia, California, Napa California Bridge, Bremerton Washington Navy Pier Replacement, University of Denver synthetic soccer field and the renovation of the Cherry Creek Trail in Denver, Colorado.
